

Colorado Mountain College Green Building Academy

The Green Building Academy provides training and certification to building professionals interested in advancing their knowledge and technical excellence in a wide-range of energy efficiency and green building topics.

Building Analyst Training

Upcoming Trainings Colorado Mountain College-Aspen

Who Should Take This Course?

- General Contractor
- Licensed HVAC Professional
- Licensed Insulation Professional
- Home Builder/Remodeler
- HERS Rater
- Weatherization Specialist

FULL COURSE WITH BOTH EXAMS

CMC-Aspen

January 11-18, 2010

This BPI Building Analyst training provides core building science knowledge, concepts, and field practice to prepare candidates to pass the Building Performance Institute (BPI) certification exams. The course is intended for individuals who have no previous Building Analyst training. The course includes:

- The fundamentals of building science and analyzing building performance problems including energy efficiency, safety, health, and indoor air quality, as required to prepare for BPI Building Analyst certification exams.
- Opportunities to take both written and field exams.

Fee: \$1600 (including lunch and both exams)

Daily Schedule: 8:30 am-5:00 pm, with 30-minute lunch break.

INTENSIVE COURSE WITH BOTH EXAMS

CMC-Aspen

January 29-February 1, 2010

This intensive BPI Building Analyst Exam Prep reviews core building science knowledge and concepts and provides field practice to prepare candidates to pass the Building Performance Institute (BPI) certification exams. The course is intended for individuals who have already completed some Building Analyst training, but would like additional review and practice before taking the certification exams. The course includes:

- one day of classroom review followed by written exam
- one day of field review and practice with a BPI certified instructor using testing equipment in the field
- final two days are for scheduling one-on-one field exams

Fee: \$550 (including lunch and both exams)

Daily Schedule: 8:30 am-5:00 pm, with 30-minute lunch break.

This comprehensive training program allows you to apply building science technology to help customers solve heating, cooling and air leakage problems that are driving high energy costs, while also providing them with a more comfortable, safe and durable home. Building science training will benefit your business and help the community to become more energy efficient.
